Dear Parents

Nexgen Accelerated IT Program

Your child has registered to participate in the Nexgen Accelerated IT program which commences on Thursday 2nd May (Week 1) of next term.

Your son will focus on software design and coding during the first term. Following on from this, they will be introduced to computer architecture, microcontrollers, electronics and further coding. Additional to this, they will be exposed to opportunities that allow creative thinking, being part of a team and developing their passion for technology.

Your son is staying on the school site and therefore the expectations that we hold during school hours are still applicable. Students will be expected to stay within the allocated space and ensure that their behaviour reflects the 3Rs.

Students are required to go the Upper Library straight after school where they will meet a member of the Nexgen Codecamp team. The session will run straight after school till 5.00pm.

Requirements: Students should bring their afternoon tea and their laptop.

If you have any further queries regarding the running of the program please do not hesitate to contact Pete at pete@nexgencodecamp.com.au or Ilana at ishaw@covenant.nsw.edu.au

Yours in the service of Christian education

Mrs I Shaw
Teacher of TAS

Mr T Hewitt
Deputy Principal, Curriculum
